(1) Row numbering, as per OSFI advisory revised April 2014, is provided for consistency and comparability in the disclosure of elements of capital among banks and across jurisdictions. Certain rows have been removed because there are no values in such rows.

(2) "All-in" regulatory capital ratios include all of the regulatory adjustments that will be required by 2019 but retains the phase-out for non-qualifying capital instruments between 2013 and 2022. The transitional period to phase in the effect of Basel III was completed as of November 1, 2017; consequently the Bank's "All-in" regulatory capital ratios are the same as its "Transitional" regulatory capital ratios.

(3) Mainly comprised of deductions for software and other intangible assets, goodwill and pension plan assets.

(4) The countercyclical buffer as at January 31, 2018 was nil, as all private sector credit exposures were either in Canada or the United States.
